

# Why Benchmark Is a Better Idea Than Bitcoin

This table describes the reasons why BMK is a better solution than Bitcoin:

Criteria	Blockchain-based Benchmark Utility Tokens	Blockchain-based Bitcoin
Backed by	Utility token creates the opportunity for participation in a Hedge Fund, Several Trading Platforms and projects that are supported by underlying value in the form of assets	No underlying assets to support its value
Income	Could potentially render returns through ownership in a variety of income producing projects	Does not have any underlying income producing assets
Volatility	Limited volatility in price due to guaranteed liquidity support through a Hedge Fund and specific trade mechanism	Often experiences extreme volatility in price and always requires a counterparty
Financials	Has its own financial ecosystems in which fixed assets goods and services can be acquired by using Benchmark Utility Tokens.	Has no internal financial ecosystem and must directly compete with fiat currencies
Tokens	Only a limited number of Benchmark Utility Tokens will be issued	Only a limited number of tokens will be issued
Use cases	Used as a means to gain access to profitable opportunities in Fintech and green technologies and to participate in the Benchmark Hedge Fund and Benchmark Decentralized Trading Exchange	Can only be used as an exchange medium with value determined by market forces and uncertainty. No hedge against inflation
Returns	Return depends on increases in value of underlying assets, in cash flow derived from assets and investment activities in those instances where the holder may participate in a given project on the specific terms of that specific project and on the market price	Return depends entirely on the market price
