

BENCHMARK TOKEN SALE

THE VENTURE TOKEN

We are a business created for real people and managed by real people. We solve problems and provide opportunities using the security of the blockchain and our utility token.

The Benchmark Utility Token has been created as a crypto-based mechanism to raise funds for the development of several exciting projects. These projects create a sustainable future and are expected to be highly profitable.

BENEFITS

- 1 The holders of the Benchmark Utility Token (BMK) will be invited on an exclusive basis to join in the funding of approved projects and in so doing acquire interests in the individual projects. Benchmark International will underwrite all projects and will provide for any required funding not provided by the holders of BMK. Projects can only be funded through an approved prospectus and holders of tokens are not compelled to participate in any given project.
- 2 The holders of BMK may hold their tokens for potential value accretion in the market.
- 3 The token holders may trade their BMK on the exchanges where the BMK will be listed.
- 4 They may also choose to place the tokens in the proposed Benchmark Hedge Fund. The fund will execute value enhancement activities as described in the white paper. There is no automatic participation in any project and all projects will issue security tokens that can only be acquired on the basis of a prospectus.

TOKEN SALE

SOME OF OUR PROJECTS INCLUDE:

- 1 Finance the expansion of a blockchain-based financial services company targeting financial inclusion for previously unbanked people through Fintech applications.
- 2 To implement state-of-the-art Material Recycling Facilities built on a unique model with proven profit results.
- 3 Bring to market a revolutionary, scalable system that desalinates or cleans water and generates electricity at the same time.
- 4 To develop a Real Estate Investment Trust (REIT) that will enable the Group to acquire its green community developments and deliver above market results and methods to build capital for further development.
- 5 To disrupt the construction industry by creating a 360° green company, that will enable users to move off the water and electricity grids in buildings constructed from green materials using renewable energy generation systems.
